***IF YOUR JOHN DEERE ENGINE HAS OVER 1500 HOURS ON IT,  
IT'S TIME TO HAVE YOUR INJECTORS TESTED.***

TODAY'S FUEL TECHNOLOGY IS CHANGING, FUEL FORMULAS & THE RISING COST OF FUEL ITSELF ARE JUST TWO REASONS TO HAVE YOUR INJECTION NOZZLES TESTED.

NOT TO MENTION HOW YOUR ENGINE PERFORMS, JUST THINK MORE POWER, LESS FUEL USED, MORE WORK DONE.

Our trained technicians will remove the injectors, install each nozzle on the test stand, check spray pattern & pressure, and clean carbon from nozzle bore as needed. If the injectors need to be replaced, we will have them on hand to install at the time of testing, so no additional labor will be needed. This also will save you time as well as getting your John Deere Engine running again.

When using Genuine John Deere Remanufactured Injectors you get one year warranty on parts & labor. Not just 90 days.

In Shop Injector Testing: \$477.00

On Farm Injector Testing: \$553.00

In shop injector testing, includes running engines on dyno (PTO equipped engines).

Repair parts *are not included in the price of the program.*

Two or more units tested receive free trucking.

Sign up today by calling David or Angie at 812-882-5750 or 800-333-4020

E-mail them at: David@dealgreen.com or angie@dealgreen.com
